- **Join Us: Explore the enthralling realm of visual storytelling and unleash your creative potential through the lens at DSP.**

DIPLOMA IN PHOTOGRAPHY

Diploma in Photography course is ideally suited for people who want to take up professional photography very seriously and want to start their work soon after completion of the course and have ample time available for learning the subject.

Course Structure

The course is designed in a manner that it covers all the important genres of photography so that after completing the course, students are capable of handling any photography assignments independently. Each of the modules are taught one by one typically over one to two months depending upon the subject by practicing professional photographers who come & teach the genre in which they practice to ensure that students get specialised knowledge in each of the subjects.

Photography being a creative art form, the course is taught in a manner that almost 90% of it is covered practically. Students are given unlimited usage of the studios during the course so that they have a free hand in experimenting & creating. To ensure complete learning, students are made to learn both using artificial light as well as in natural light.

"Photos are a reflection of a story and full of meaning."

CURRICULUM

Creating the base & laying the foundation in photography

- **The art of seeing subjects for photography**
- **The art of locating or arranging subjects for Photography**
- **The science and technology in use in photography**
